U.S.S. ALBACORE (SS218)

SS218/Alt-5

Serial (015)

Care of Fleet Post Office,
San Francisco, California,
16 July 1944.

~~CONFIDENTIAL~~
DECLASSIFIED

From : The Commanding Officer.
To : The Commander-in-Chief, UNITED STATES Fleet.
Via : (Official Channels).

Subject: U.S.S. ALBACORE, Report of War Patrol Number NINE.

Enclosure: (A) Subject Report.
(B) Track Charts.

1. Enclosure (A), covering the NINTH War Patrol of this vessel, conducted west of the Philippines and in the South China Sea during the period 29 May 1944 to 16 July 1944, is forwarded herewith.

J. T. LUCHEARD.

Authority NN-1428
By DDB MARA Dm 3/94

CONT'D. FROM U.S. IMPERIAL - Report of 111TH War Patrol

(A) PROGRESS:

Arrived Pearl Harbor, H.I., 22 February 1944, from 111TH War Patrol, voyage repairs 22 to 26 February. Enroute Navy fire, Mare Island, Calif. for overhaul 26 February 1944 to 1 March. During overhaul received the following major alterations and equipments: "Trigger type" bridge, bridge and conning tower ballast protection, two 4" - 5" gun foundations, 4" deck gun, removal of conning tower door, I.F.T. equipment, SJ-a, halide, SP-4 radar, J-1 Sonar equipment, TBM Modulator, D.R.T., 1000 P.M.d., S.T.O.C. Dampened storage, 7100 steel vent risers and 17 main belt tanks, 4 main ballast tank converted to fuel ballast, steel ceiling, gear hatch, high angle attack periscope, new port to conning tower, laminated jars and rearrangement of cells of main stored battery, 110 hydraulic pump, 1000 rpm pump, 1000 rpm used for Mk 18 torpedoes, three slot graters in main engine, main engine detached, exhaust piping, dropped, to allow for exhaust valves all main engines, hydraulic operated to forward exhaust valves for auxiliary engine, deck modification of main control cubicle, removal of deck space equipment, insulation in Chronic liners with aluminum biscons, all main engines, battery supply for 10 motor generators, electric solenoid operated clutches for bow and stern planes, Gislyn director system and auxiliary dry cell indicator for bow and stern planes, lathe Officer's room, a star chart, a dog control (normal-medium-slow) for diving planes, six extra tanks for crew, midship house to 13 sanitary tank, belt drive for main steering counters, latest modification of propellers (feathered).

1 May completed Navy yard overhaul. 5 to 9 May Readiness for sea. Enroute Pearl Harbor 9 to 10 May in company with ASR 1740, conducting training exercises. 15 to 29 May voyage, patrols and training at Pearl Harbor; training included convoy exercises.

Much valuable info derived from training enroute Pearl Harbor in company with ASR 1740. More than a week of extensive work in all of sound operators, rear operators, tracking and control party gave gratifying results. Much could not have been done had ASR 1740 not been available. It is strongly recommended that after exercises be returned to Pearl Harbor in pairs over three to five days to hold over a total of ten days until carrier is ready.

The convoy exercises continue to be the most realistic and most strenuous training offered.

~~1977-1978~~ The experience on the ~~1977-1978~~ ~~1977-1978~~

DE12 L. S. - In the off ice. Doves similar to 1Dn bearing
S 20 E(1), elevation-2°. Evidently a patrol from
Vicks. (aircraft contact #1) Dove. Lat. 26°-47' N.
Long. 160°-38' E.

Dr. L. C. Madsen.

June 9

1055 K. Lat. $25^{\circ}-27^{\circ}$ N. Long. $153^{\circ}-170^{\circ}$ E. We were met
by a dredger to be "Yukon" on horizon bearing 320° (T).
Increased speed to full and changed course to
investigate.

~~b7D b8E~~ NARA Doc 3/PW
~~CONFIDENTIAL~~ U.S.S. ALBACORE - Report of NINTH War Patrol

1111 K Sighted single engine float plane similar to Rufe (Aircraft Contact #2) bearing 200°(T), range 7 miles, elevation 1°, believed to be a patrol from MARCUS. Dove. Lat. 25°-30' N. Long. 153°-05' E.

1143 K Surfaced on all engines continuing to investigate possible smoke on horizon.

1229 K Smoke proved to be a cloud.

1403 K Dived off search. Slowed and returned to course line.

June 10

1601 K In Lat. 23°-48' N. Long. 145°-35' E. sighted "masts" on horizon bearing 205°(T). Commenced tracking. Interference on SW and SW and tri firing of AK indicate friendly vessel. Closest to investigate.

2105 K Engaged masts with 127mm (SS314) and continued on our way.

June 11

0635 K In Lat. 21°-54' N. Long. 143°-10' E. sighted several masts bearing 236°(T), distant 15 miles. Commenced tracking. Targets evidently convoy headed for Ilo Shima at estimated speed of 10 knots.

0710 K While enroute and aound with only 26 more degrees to go sighted aircraft, distant 6 miles, elevation 2°, similar to SAI I heading for convoy and coming from direction of Ilo Shima. (Aircraft Contact #3). Dove to escape detection. Lat. 22°-56' N. Long. 143°-40' E.

0825 K Flung out of sight. Surfaced. Lost contact with convoy. Commenced search to west and north at maximum speed to regain contact ahead until

0912 K When sighted aircraft, type unknown, bearing 180°(T), distant 12 miles, elevation 2°. (Aircraft Contact #4) patrolling in our direction. Dove in Lat. 23°-09' N. Long. 142°-36' E. to avoid detection.

0956 K Flung out of sight bearing 240°(T). Surfaced on course 320°(T) at maximum speed attempting to regain contact.

1004 K Sent ALBACORE first (102327) to ComSubPac blind. Unable to raise HFM.

By DDB MARA, DDM 3/94

~~CONFIDENTIAL~~ U.S.S. ALBACORE - Report of NINTH War Patrol

1640 K. Believing convoy to be to southward changed course to 200° (T).

1652 K. Sighted two aircraft (Aircraft Contact #5) similar to ENIES bearing 295° (T), range 6 miles, elevation 10° , on course 160° (T) crossing from starboard to port. Dived to avoid detection. Lat. $23^{\circ}-17'$ N. Long. $142^{\circ}-45'$ E.

1654 K. Changed course to 340° (T).

1135 K. Surfaces on all engines.

1155 K. SJ-Radar Contact 14 miles (Aircraft Contact #6).

1156 K. Sighted ENIES bearing 050° (T), elevation 3° , tracked aircraft with SJ-Radar. Lat. $23^{\circ}-22'$ N. Long. $142^{\circ}-42'$ E.

1209 K. Having lost radar contact with aircraft, commenced intensive search for convoy at maximum speed.

1215 K. Completed rotating search. Covered all convoy courses between 205° (T) and 005° (T) and all speeds between 5 and 15 knots. Set course 035° (T) to intercept area had front circle cross line.

1220 K. Sighted (ENIES) second (line #2) to ComSubPac. Line #2 to raise N.Y. sea blind.

12 June (all local items)

0712 Proceeded through (primarily lumber) close aboard to starboard. Lat. $23^{\circ}-04'$ N. Long. $140^{\circ}-10'$ E.

0900 Set base course 194° (T) to starboard line for assigned area off P.A.W.

1000 Barometer has dropped steadily since midnight. Sea beginning to make up.

1715 In Lat. $20^{\circ}-31'$ N. Long. $139^{\circ}-42'$ E. Port lookout thought he saw mast bearing 100° (T). Went ahead full on all engines to investigate.

1740 Search proved fruitless. Set course to intersect course line and slowed.

2000 Barometer has dropped 16 points since midnight. Sea very rough, no indications of hurricane.

CONFIDENTIAL U.S.S. ALBACORE - Report of NINTH War Patrol

13 June (all times Item)

- 0630 Changed course to $168^\circ(T)$ to prevent heavy pounding.
1000 Sea and wind decreasing. Changed course to $200^\circ(T)$ to get back on course line. Lat. $16^\circ-50' N.$ Long. $138^\circ-40' E.$

14 June (all times Item)

- 0816 Increased speed to full and set course to $183^\circ(T)$ to intercept damaged enemy convoy reported to be between Guam and Yap. We are behind schedule due to late departure from Midway; search for convoy on 11 June; and slow speed of advance for past 24 hours due to heavy head seas. Lat. $14^\circ-30' N.$ Long. $138^\circ-37' E.$

- 1330 Changed course to $181^\circ(T)$.

- 1440 Sighted and changed course to $327^\circ(T)$ to head for station designated by ComSubPac. Lat. $12^\circ-30' N.$ Long. $138^\circ-52' E.$

- 2120 Changed course to $261^\circ(T)$ to head for new station designated by ComSubPac. Lat. $13^\circ-52' N.$ Long. $137^\circ-44' E.$

15 June (all times Item)

- 0830 On station Lat. $14^\circ-30' N.$ Long. $137^\circ-00' E.$ Commenced patrolling 50 miles either side of station on line $180^\circ(T)-170^\circ(T)$. Exercising all section dives, drills, and battle stations.

16 June (all times Item)

- 1624 Patrolling as before. Spotted aircraft (Contact 17) similar to JN-4 Bearcat. $161^\circ(T)$, distant 8 miles, elevation 3° , heading toward us from low cloud bank. Dove. Lat. $14^\circ-10' N.$ Long. $137^\circ-07' E.$

- 1705 Surfaced.

- 1754 Contact at 15,000 yds. on SJ radar bearing $234^\circ(T)$. Ahead full all engines to investigate.

- 1819 Major contact proved to be rain squall. Slowed and resumed patrol.

CONFIDENTIAL U.S.S. ALBACORE - Report of NINTH War Patrol

17 June (all times Item)

0842 Patrolling as before. Sighted aircraft (Contact #3) similar to BET Y, bearing 140° (T), distant 12 miles, elevation 4° , on course 270° (T). Dove to avoid detection. Lat. $14^{\circ}-30'$ N. Long. $137^{\circ}-06'$ E.

0812 Surfaces.

1300 Sighted aircraft (Contact #9) similar to BET Y bearing 115° (T), distant 15 miles, elevation 3° on easterly course. Dove. Lat. $14^{\circ}-15'$ N. Long. $137^{\circ}-03'$ E. BET Y changed course to north at 1330 and was lost to sight at 1340 bearing 000° (T).

1332 Sun sets.

13 June (all times Item)

0848 Patrolling as before. ASJ contact, bearing 263° (T), range 25,700 yards. Commenced tracking. Lat. $13^{\circ}-28.5'$ N. Long. $136^{\circ}-49'$ E.

0953 Lost target at 27,000 yards. Believed to be low flying patrol plane, due to rapid increase in range and rapid bearing changes. (Aircraft Contact #10).

0900 Rec'd orders from Co-SubFsc to shift patrols station south 100 miles. Proceeding to new station.

1200 On net station. Lat. $12^{\circ}-20'$ N. Long. $137^{\circ}-00'$ E. Patrolling thirty miles either side of station, on line $000^{\circ} - 180^{\circ}$ (T).

19 June (all times Item)

0400 Patrolling as before. ASJ contact at 8 and 11 miles. Dov. Lat. $12^{\circ}-10'$ N. Long. $137^{\circ}-20'$ E. (Aircraft Contact #11).

0705 Surfaces.

0716 Sighted aircraft (Contact #12) similar to BET Y, bearing 010° (T), range 5 miles, elevation 1° . Dov. Lat. $12^{\circ}-20'$ N. Long. $137^{\circ}-00'$ E.

Authority NN 214

By DDB NARA Doc 3194

CONFIDENTIAL U.S.S. ~~ALBACORE~~ - Report of Ninth War Patrol

- 0750 While submerged sighted aircraft carrier, a cruiser and the tops of several unidentified ships. Bearing of carrier 288° (T), range about 13,000 yards, angle on the bow 70° P. Sounded battle stations, increased speed and started swinging to port. Ship had reached a course of 272° (T), when at
- 0753.30 Sighted second aircraft carrier, another cruiser and several destroyers. Bearing of carrier 329° (T), angle on the bow 10° S, selected this carrier as target and came right for a 70° S track. Could not get range at this time due (1) to heavy haze.
- 0801 Obtained set up. Range 9000 yds., angle on the bow 15° S, distance to track 2300 yards.
- 0802 Destroyer between ALBACORE and target, bearing 314° (R) with a 10° S angle. Changed course to north to allow destroyer to pass ahead.
- 0804.15 Range 5300 yds., 1850 yds., from track, swung right to 050° (T) for a 90° S. track. Plot had a speed of 27 knots which was set on the FDC. Shortly after this time (exact time not recorded) a quick look around showed a cruiser on our port quarter crossing the storm well clear, two destroyers on the target's starboard quarter, the cruiser and the carrier sighted at 0750; 6000 yards to 8000 yards on our starboard quarter, and numerous planes in the air.
- 0806.45 Set up checks with previous data.
- 0808 (approx.) Orders were given to "up scope", "stand-by #1". Immediately it was noticed that the FDC was not indicating a correct solution. Hoisting of the periscope was stopped, and a quick effort made to determine the reason for no correct solution right. The relative bearing was changing rapidly. It was too late to use the Mk. 8 firing bearing, even if we had resorted to swinging, so rather than miss out entirely on getting off a shot, at
- 0809.32 Final bearing was set on FDC and commence firing ordered. Fired six from the bow tubes. Lat. $12^\circ-22' N.$ Long. $132^\circ-04' E.$

~~CONFIDENTIAL~~ U.S.S. ALBACORE - Report of Ninth War Patrol

0811 Went to deep submergence with three destroyers heading our way, and many planes overhead.

0811.27 Heard and felt explosion, definitely not a depth charge. Time of run correct for a hit with No. 6 torpedo.

0813 String of six depth charges, the fourth and fifth of which shook the boat badly and knocked cork from the conning tower bulkheads.

0816 Seven more depth charges, two of which were close.

0826 A string of six charges straddling but overhead.

0837 Another string of six charges overhead appeared to be staggered in depth.

0855 A distant and persistent explosion of great force was felt and heard. Duration six seconds including water noises.

0900 A distant underwater explosion of great force but short duration was felt and heard.

0904 Felt and heard an explosion similar to that at 0855 started up to periscope depth to investigate.

0905 - 1200 During this period made several attempts to come to periscope depth, but upon passing 200 ft. the searching vessels would make contact and close although no torpedoes or depth charges were dropped during this period, none of which were close. Depth charge seems to be dropped at random with little or poor contact. Made reloads forward.

1201 At periscope depth.

1207 Sighted last of DD bearing 109° (T). Changed course to 100° (T).

1211 Lost visual contact with DD.

1312 Surfaced, Lat. $12^\circ-17'$ N. Long. $137^\circ-06'$ E. at standard speed on course 140° (T) and Pgo.

1307 On contact 13 miles (Aircraft Contact #14) Lat. $12^\circ-01'$ N. Long. $137^\circ-10'$ E.

By DDB NARIA Date 3/7

CONFIDENTIAL U.S.S. ALBACORE - Report of Ninth War Patrol

1510 Submerged with SD contact closing to 3 miles.

1545 Surfaced at standard speed on course 315° (T) and pge.

1600 On station patrolling twenty miles north and south.

22 June (all times Item)

Patrolling on station.

0625 Sighted plane bearing 140° (T), range 9 miles, Submerged. (Aircraft Contact #15)

0654 Surfaced.

0715 Commenced passing through oil slick of about 10 square miles in area. Lat. $12^{\circ}-20'$ N. Long. $127^{\circ}-01'$ E. This position is 4 miles from position of yesterday's attack on carrier. Stop oil and flooded down to get samples of oil.

0754 Fuel sampling interrupted by aircraft Contact #16. Dove.

0804 Surfaced.

0854 Submerged for aircraft Contact #17.

0905 Aircraft lost to periscope sight bearing 075° (T).

0935 Surfaced.

0937 SD contact 18 miles. Aircraft Contact #18. Sighted LTTY.

0943 Submerged.

1010 Surfaced.

1025 Sighted ZWRY (Contact #19) bearing 135° (T), distant 15-20 miles, elevation 1° . Lat. $12^{\circ}-30'$ N. Long. $136^{\circ}-30'$ E.

1131 Submerged for aircraft Contact #20..

1406 Surfaced.

Authority UNCLASSIFIED
By DRB NARIA Date 3/94

COPYRIGHT U.S.S. ALB. CORE - Report of Ninth War Patrol

1526 Submerged for aircraft Contact #21.
1555 Surfaced.
1820 Passed thru h. oil slick previously sighted in morning.
2107 Submerged with aircraft contacts at 10 and 15 miles on SD and SJ radars. (Contact #22).
2130 Surfaced.
2310 Aircraft Contact #23. SD contact at 25 miles which was lost five minutes later.

21 June (all times Item)

Patrolling for station.

0446 Received orders to search for aviators down at Lat. $18^{\circ}-00' N.$, Long. $130^{\circ}-50' E.$
0835 Received orders from ComSubfrc to shift station to 18°-00' N., 130°-50' E. Change course to 262°(T) to head for Lat. $18^{\circ}-00' N.$, Long. $131^{\circ}-00' E.$

1021 Submerged for aircraft contact #24.

1114 Surfaced.

1330 Auxiliary engine out of commission due to broken flexible coupling between generator and engine.

22 June (all times Item)

0918 While enroute new patrol station received orders from ComSubfrc to assume lifeguard duties vicinity of Iwo Jima, OLIPI. Changed course to 117°(T) to head for new station.

1025 Investigating floating wooden buckets and drums. Recovered one wooden bucket with Jap characters written thereon. Lat. $12^{\circ}-50' N.$, Long. $131^{\circ}-30' E.$

1110 Resumed basic course.

23 June (all times Item)

On route YAP area, for lifeguard duties.

0654 Submerged for aircraft contact #25.

0730 Surfaced.

0809 Submerged for aircraft Contact #26.

1021 Surfaced.

1150 Suberged for Aircraft Contact #27.

1231 Surfaced.

24 June (all times Item)

0600 On station for lifeguard duties midway between
YAP and JULIET I.

0627 Submerged for aircraft Contact #28.

0847 Surfaced. Aircraft similar to MITCHELL.

0914 Submerged for aircraft of Contact #28. Received one
depth bomb will passim 100 ft. not close,
no damage.

0950 Surfaced.

1011 Contact on 3D radar at 21 miles, moved to 20 miles
and was lost at 20 miles. Contact #29.

1021 Contact on 3D radar similar to above. Contact #30.

1030 S. contact 35 miles closed to 33 miles and then
opened to 50 miles and was lost. Contact #31. These
believed to be U.S. Army bombers, over YAP.

1116 X.I. in sight bearing 300° (T) distant 23 miles.

1130 Set course to head for to south and west of YAP
to intercept possible shipping from PELAU during night.

Authority DN-11470
By DMR NARA Date 3/74

CONFIDENTIAL U.S.S. ALBACORE - Report of Ninth War Patrol
SD contact 22 miles. Drove as it was closing rapidly
1604 to 15 miles. Contact #32.
Surfaced. Patrolling south and west of YAP.
1640
2200 Headed east to be on station for tomorrow's raid
by Army.

25 June (all times item)

- 0604 Sighted BETTY patrolling at 10 miles, bearing $350^{\circ}(T)$.
(Contact #33) heading away.
0617 Headed north to get on line midway between YAP and
ULITHI.
0807 Sighted BETTY at 13 miles bearing $347^{\circ}(T)$.
(Contact #34), range opening.
0845 Changed course to close YAP and be in position for
strike at 1030.
0936 YAP bearing $275^{\circ}(T)$, 27 miles.
1016 SD contact 27 miles. Aircraft contact #35). This
contact on the SD screen at ranges varying from
30 to 17 miles until
1037 When flight of 21 LIBERATORS sighted headed for YAP.
Went ahead full on all engines, closing YAP.
1101 Observed large fires on YAP.
1120 Received word on voice circuit that plane was coming
down 95 miles bearing $290^{\circ}(T)$ from SOROL. This
message distinctly heard by Communication Officer.
1123 Changed course to $153^{\circ}(T)$ to head for downed plane,
and increased speed to maximum.
1135 Received word on 8455 CW that plane was down. This
position plotted in 2 miles off TONIL HARBOR entrance.
Continued to position of first plane reported as
chances of rescue were thought to be better.
1418 Arrived at reported position of downed plane and
commenced search.
1850 Received word on 8455 CW that plane was down one
mile south of YAP.

SUMMARY
By DBB NARA Date 3/74

CONFIDENTIAL U.S.S. ALBACORE - Report of Ninth War Patrol

- 1915 On 8455 CW asked if there was a plane down in area we were searching. No answer received.
- 2207 Discontinued search and set course for south end of YAP.
- 26 June (all times item)
- Enroute new search area.
- 0430 Two miles south of YAP, searching area.
- 0530 SD contact 8 miles (Aircraft Contact #35). Dove. Conducted search submerged along southeast coast of YAP.
- 0622 Sighted ZKE thru periscope (Aircraft Contact #37).
- 0630 Sighted BETTY thru periscope (Aircraft Contact #38). This plane or similar one's searched in our vicinity until 1015.
- 1030 Attempted to surface several times during the next hour but was held down by SD and sight contacts (Aircraft Contact #39) varying in range from 1 to 12 miles.
- 1108 Heard explosions and shortly thereafter sighted fires on YAP.
- 1143 Surfaced.
- 1205 In view of the fact we had been submerged during day's strike called the Army Bombing Base and asked if they had any area for us to search. No answer received.
- 1350 SD contact 9 miles (Aircraft Contact #40). Dove. Identified plane by periscope as BETTY.
- 1423 Surfaced.
- 1525 Set course to head for end search } area southeast of YAP.
- 1540 SD contact 11 miles (Aircraft Contact #41). Dove. Range opening.
- 1930 Commenced search of area.

- 0843 Surfaced.
- 1013 SD contact 19 miles, opening (Aircraft Contact #55).
- 1032 Sighted the first of 40 LIBERATORS headed for YAP (Aircraft Contact #56).

Authority ND92306
By DDR MARA Dm 3/74

CONFIDENTIAL U.S.S. ALBACORE - Report of Ninth War Patrol.

- 1049 - 1107 Observed bombing of YAP (Huge fires in YAP TOWN, and at airfield), moderate anti-aircraft fire over YAP, and air battle between LIBERATORS and Jap fighters. Fighters broke off engagement. Counted 40 LIBERATORS heading south.
- 1108 SD contact 7 miles, closing (Aircraft Contact #57). ZEMI sighted at 6 miles.
- 1109 Dived. SD range 1 mile as mast went under.
- 1134 Surfaced, heading south at full speed to clear YAP.
- 1330 Set course for area southwest of YAP to continue search for plane downed on the 25th.
- 1900 Commenced search of area.
- 29 June (All times item)
- Searching area.
- 0513 Set course for position for day's strike.
- 1024 In position. First of many SD contacts 12 to 35 miles. (Aircraft Contact #58). Began closing YAP. Observed bombing of YAP, anti-aircraft fire, and air battle between Army bombers and Jap fighters. Numerous contacts on SD.
- 1058 SD contact 4 miles, closing (Aircraft contact #59). Dived. Strafed by ZEMI as diving alarm was sounded, and again just before bridge went under. Several holes in deck and superstructure, hits on the bridge and one 20MM hole in breech cover of 4" gun. No casualties to personnel.
- 1123 Surfaced at full speed. Numerous SD contacts, 11 to 23 miles. (Aircraft Contact #60).
- 1129 SD contact 3 miles, closing. (Aircraft Contact #61). Dived. Strafed twice after passing 40 feet. No damage.
- 1210 Surfaced at full speed.
- 1215 SD contact 2 miles, closing. (Aircraft Contact #62).

Authority NAD92305
By DAB NARA Date 3/71

CONFIDENTIAL U.S.S. ALBACORE - Report of Ninth War Patrol.

- 1331 Surfaced at full speed, clearing YAP.
1342 Asked Army Bomber Command if they had mission for us.
1355 Set course to investigate conditions around ULITHI.
1445 Received word from Army Bomber Command that there were no missions for two days.
2235 With Pig Island bearing 085°(T), distance 5 miles, changed course to round southern tip of ULITHI group.

30 June (all times item)

- 0008 Decided to bombard phosphate works on FAIS Island at dawn. Set course 078°(T).
0414 Sighted FAIS Island dead ahead distance 11 miles.
0425 Went to battle stations for gun attack.
0505 On course 040°(T), commenced firing deck gun at phosphate works on FAIS Island, initial range 3000 yards, target bearing 060°(Rel). Shortly thereafter opened fire with 20MM and 50 Cal. Fire was not returned.
0512 Checked fire.
0516 Changed course to 200°(T) for port run, and to close target.
0520 Resumed fire, range 2200 yards, closing.
0524 Ceased firing. Cleared FAIS on course 300°(T).
0650 Lost sight of FAIS, reduced speed and commenced surface patrol north and west of FAIS.
1225 FAIS bearing 198°(T), distance 17 miles, submerged and began closing island.
1730 Went to battle stations for gun attack.

Authority UNRESTRICTED
By DDP NARA Date 3/74

CONFIDENTIAL U:S.S. LBACORE - Report of Ninth War Patrol.

1744 Battle surfaced on course $040^{\circ}(T)$ at full speed and commenced firing 4", 20MM and 50 Cal. at phosphate works, range 2000, closing.

1752 Canceled firing, cleared F IS on course $270^{\circ}(T)$, proceeding Speedway area in accordance with orders from ComSubPac.

1 July (all times Item)

0915 SD contact 18 miles, opening. (Aircraft Contact #63).

1430 Entered assigned area patrolling on the surface north of PHALAU.

2 July (all times Item)

Patrolling area.

0626 Sighted BETTY range 10 miles, closing. (Aircraft Contact #64). Dove.

0715 Surfaced, continued patrol.

1255 Sunk belly tank of plane with small arms fire.
Lat. $09^{\circ}-39'N$. Long. $134^{\circ}-12'E$.

1800 Set course $140^{\circ}(T)$ to intercept traffic between YAP and PALAU.

2255 Requested permission to pick up fuel and ammunition and continue patrol one additional week.

3 July (all times Item)

0518 Received orders to proceed Scudler for fuel and ammunition and return to patrol area.

0635 Sighted BETTY range 7 miles, closing. (Aircraft Contact #65). Dove.

0700 Surfaced.

0734 Sighted unidentified plane range 12 miles, opening. (Aircraft Contact #66).

Authority NN-11470
By DRB NARA Date 3/94

CONFIDENTIAL U.S.S. ALBACORE - Report of Ninth War Patrol.

- 0753 Sighted west on the horizon bearing 045° (T), commenced tracking. Lat. $08^{\circ}-22'N$. Long. $136^{\circ}-30'E$.
- 0757 Sighted NAVIS over the target, range 15 miles, closing. (Aircraft Contact #67). Dove.
- 0819 Surfaced.
- 0823 Picked up target bearing 042° (T), angle on the bow zero, dove and commenced approach.
- 0900 Target identified as wooden inter-island steamer, approximately 900 tons. Decided on gun attack.
- 1010 Battic surfaced, and commenced firing 4" deck gun. (See Gun Attack #3).
- 1035 Ceased firing, clearing the area temporarily at full speed. Target at this time was burning furiously throwing a huge column of black smoke and flame in the air.
- 1119 Submerged and closed target, hoping rescue vessels would appear on the scene.
- 1320 Sighted SALLY circling burning ship. (Aircraft Contact #68).
- 1336 SALLY disappeared heading for PALAU.
- 1412 Sighted several survivors in the water.
- 1545 Surfaced.
- 1605 Picked up five wounded survivors who were clinging to wreckage. They were stripped of all clothing and clothing disposed of. Personal effects retained. Prisoners, under guard, were then sent below for medical treatment after which they were confined to the now empty 4" magazine.
- 1610 While searching for other survivors, No. 3 main engine put out of commission due to casualty to blower. (Major defects).
- 1630 Sighted SALLY, range 12 miles, closing (Aircraft Contact #69). Dove.

Authority: AND7A305
By DBR NARA Date 3/94

CONFIDENTIAL U.S.S. ELBACORE - Report of Ninth War Patrol.

- 1756 SALLY cleared area. Surfaced to pick up more survivors. Two Japs swimming in water evaded capture.
- 1812 Approached half-submerged life boat. When close aboard saw two women clinging to side of boat and a child, 4 to 5 yrs. old, lying on the forward thwart.
- 1820 Four man rubber life boat with food, fruit juices, water and Bowie-knife put over along side the damaged life boat.
- 1831 Sighted SALLY at 12 miles, closing. (aircraft contact #70). Dove.
- 1901 Surfaced.
- 1912 SJ contact 8 miles. Dived when closed to 5 miles. (aircraft contact #71).
- 1956 Surfaced and abandoned rescue of remaining eight survivors. Proceeding Seeadler.
- 2400 Departed Speedway.
- 4 July - 7 July
Enroute area to Seeadler.
- Q400I/5 Passed to temporary operational control of CTF-72.
- 1000I/6 Set clocks ahead one hour to plus ten (King) Zone time.
- Enroute Seeadler had aircraft contracts #72 to #84 incl. (See Section G).
- 8 July (all times King)
Enroute area to Seeadler.
- 0520 Made rendezvous with HMAS BARCOO.
- 0952 Moored starboard side to U.S.S. BULL in port rest of U.S.S. BURYAH.
- 1100 Five prisoners and captured documents turned over to the custody of Provost Marshal, First Calvary Headquarters, Los Negros, Admiralty Islands.

CONFIDENTIAL U.S.S. ALBACORE - Report of Ninth War Patrol.

During the afternoon the officers and crew of the ALBACORE were guests of ComSubRoh EIGHTEEN and Staff at the dedication ceremonies of "EURYALE FIELD". This kindness and many others extended during our short stay were greatly appreciated by all hands.

9 July (all times KING)

Moored in port rest of U.S.S. EURYALE.

Having fueled and received full allowance of ammunition and completed minor voyage repairs, got underway enroute Seeadler for Majuro (Escorted by SC 892) in accordance with despatch orders of CTF-17 and CTF-72.

1945

Released escort.

10 July - 16 July

Enroute Seeadler to Majuro had aircraft contacts #85 to #88 incl. (See section G).

0710K/13

Sighted periscope thought to be between ALBACORE and horizon. Took evasive action to north and east working back to course line.

0931K/13

Sent contact report to ComSubPac.

1000K/13

Sighted PIPEFISH bearing 150° (T), range 10 miles.

1150L/13

Joined company with PIPEFISH and proceeded.

1400L/15

Sighted masts bearing 150° (T), closing.

1420L/15

Exchanged calls with PC 583, escort.

1443L/15

Received harbor chart and instructions from escort. Proceeding to Majuro.

(H) ATAKO Torpedo Attack Report

U.S.S. ALBACORE Torpedo Attack #1 Patrol #9.

Fri 0810 I Date: 19 June 1944 Lat: 12-22 N. Long: 137-04 E.

Target Data and Damage Inflicted

Description: Jap carrier task force consisting of two carriers (one SHOJI class, other unidentified), two cruisers (one YAMATO Class, other unidentified), and at least six destroyers. Contact made by periscope while submerged. Visibility fair. Low clouds, hazy horizon. Classification of identification: 1 SHOJI class carrier and 1 AMAGI cruiser - EC. 2 HATSUHARU destroyers - EC. 1 carrier, 1 cruise, and 4 destroyers un.

Ship(s) sunk: None.

Ship(s) damaged: One SHOJI class carrier. Tonnage 29,800. (Taken from UNI report serial No. 86-43 of 1 October 1943).

Damag. Determined by: One timed torpedo hit. Three heavy explosions of long duration one hours later. Task force minus one carrier and three destroyers (one of these still with ALBACORE; when attacked by GATOES three hours later). Oil slick covering 10 square miles in vicinity of attack 22 hours later.

Wario Draft: 21' Course: 142° Range: 1400 yards.

Own Ship's Data

Speed: 5 - 6 knots. Course: 052 - 053 Depth: 64' Angle: 1° down.

Fire Control and Torpedo Data

First attack: Submerged periscope attack, using TDC, plot and solution. Attack lasted 14 minutes, three complete "set-ups" being obtained. TDC failed to show correct-solution light. (See section 7). While trying to locate the trouble, target got by the W.L.S. firing bearing. Thinking possibly the correct solution light was burned out, or proper contact not being made, and rather than miss a shot entirely, the TDC solution was accepted as correct and firing commenced. Continuous bearings from the periscope were set in the TDC. Post analysis showed the generated gyro angle was lagging the correct gyro angle approximately 15°.

GUN ATTACK REPORT

(H) ATTACK DATA

U.S.S. ALBACORE

GUN ATTACK NO. I PATROL No. 9.

Time: 0505 I Date: 30 June 1944 Lat. 09-47N Long. 140-31.5 E.

Target Data - Damage Inflicted

Sunk:

Damaged: Phosphate Works on FAIS Island.

Damage determined by: Observed numerous small fires of short duration started. Fair amount of smoke in target area. Large sections of roof seen flying in the air after explosion of H.C. shells.

Details of Action

At 0505 on course 040°(T) range 3000 yds. bearing 060° relative opened fire with 4" deck gun on Phosphate Works. As range closed opened fire with 20MM and 50 cal. At 0512 checked fire and at 0516 changed course to 200°(T) for port run. At 0520 with range 2200 yards and closing, again opened fire with deck gun, 20MM and 50 cal. Ceased fire at 0524 and retired having expended 54 rounds of 4" common and H.C.P.D., 360 rounds of 20MM, and 500 rounds of 50 cal. Fire not returned.

Fire control consisted of SJ ranges on bluff beneath target being sent to range spotter in periscope shears. Spotter applied necessary correction and sent to gun by telephone. Deflection spots were made by the Battery Officer at the gun.

Percentage of hits from 4" estimated at 80. It is difficult to understand why any shells missed such a large target at the range used.

CONFIDENTIAL

GUN ATTACK REPORT

(H) ATTACK DATA

U.S.S. ALBACORE

Time: 1744 I

GUN ATTACK NO. 2 PATROL NO. 9

Date: 30 June 1944 Lat. $09^{\circ}47'N$.
Long. $140^{\circ}31.5'E$.

Target Data - Damage Inflicted

Sunk:

Damaged: Phosphate Works on FAIS Island.

Damage Determined By: Observed many hits. Numerous fires started.
Roofs blown off several structures.

Details of Action

At 1744 made Battle Surface on course $040^{\circ}(T)$ range 2000 yards and opened fire on Phosphate works with 4" deck gun, 20MM, and 50 cal. Changed course to close range to 1200 yds. At 1752 ceased fire and retired having expended 24 rounds of 4", 240 rounds of 20MM, and 250 rounds of 50 cal. No fire returned. Fire control at these short ranges was practically unnecessary. An initial SJ range was given to the spotter who made small adjustments as required.

The fire was accurate and deliberate. Hits with K.C.P.D. projectiles blew the roofs off of buildings sending tin flying in all directions.

Percentage of hits from 4" estimated at 90.

(H) TRUTH DATA

GUN ATTACK REPORT

U.S.S. ALASKA

Gun Attack #1

Patrol #9

Time: 1010 I Date: 3 July 1944 Lat: 08°10' N. Long: 136-18 E.

Target Data - Damage Inflicted

Sunk: Gne S/C, 980 tons, TAIPEI MARU. Identity established by 3 survivors taken aboard as prisoners of war.

Damaged or Probably Sunk: None.

Damage Determined: Saw ship burn to waterline - Completely destroyed.

Details of Action

Att. info target on course 220°(T), speed 7½ knots, enroute VAP to H.H.U. Target surfaced on converging course target bearing 000° relative, range 6300 yards. Fired three rounds from 4" deck gun target estimated to grade on northerly course. Fourth round was 7.5...5 and exploded in rigging, covering target with shower of steel. Selected fire. Closed range to 2500 yds. and fired four common projectiles. All were seen to pass thru the target without exploding. Continued firing common and H.C.F.B. closing range to 1200 yds. at which range opened up with 4 M.G. and 30 cal. Dangerous hits caused entire vessel to burst into flame, in less than one minute.

The common projectiles which hit the target were either duds or their effect was negligible. The H.C.F.B. projectiles had a devastating effect upon target.

Fire control consisted of using SJ radar ranges set on gun with deflection spotter at gun un. Range spotter stationed on high lookout platform with telephone connection with sight setter.

Rounds Fired:

20 mm. - 20 rounds
20 mm. - 120 rounds
30 cal. - 500 rounds.

(I) MINES.

Neither mines nor minelaying activities encountered.

(J) ANTI-SUBMARINE MEASURES AND EVASIVE TACTICS.

Following our torpedo attack on 19 June depth charges dropped during the first forty minutes were in patterns of six or seven at almost exactly 10 minute intervals and apparently staggered in depth. Two of these patterns shook the boat considerably. During the next three hours 48 charges were dropped at random, or with poor or no contact. Attacking DD's used listening only.

At approximately one hour after firing torpedoes three distant explosions of fairly long duration and at 5 minute intervals were heard and felt. These explosions pushed large quantities of water through the superstructure causing prolonged swooshing noises. Whether this was a new type of anti-submarine measure or explosions on the target is not known. The force was greater than any explosion ever felt by old timers on the ALBACORE.

Evasive tactics may be summed up in few words: Deep and silent; fish tailing to keep attackers astern. Listening conditions appeared to improve at shallow depths though no temperature gradient was noted. After quiet periods, three attempts to reach periscope depth were frustrated by charges dropped in our vicinity.

AMMUNITION
By 100B MARA Date 3/94

~~CONFIDENTIAL~~

(X) Major Defects and Damage.

1. While underway from Pearl Harbor to Midway, #2 Lighting Motor Generator began to overheat to such an extent that only two hours continuous operation was possible. At midway all bearings were secured. No further difficulties experienced.

2. 1645 May 29 enroute Pearl Harbor to Midway, stern plane clutch coil burned out causing a small electrical fire which was quickly brought under control. Clutch was lashed in place with #8 tail line. Shout knife was kept readily available. Midway had no spares. Coil from U.S. S. RGO was installed. No further difficulty experienced.

3. 0200 June 2 discovered 11" crack in #3 main engine housing, aft and outboard extending on 45° angle around the end of the engine to the bedplate. At Midway, end of crack was drilled and bolted, crack welded, and engine considered to be in condition for normal operation.

4. 0130 June 5 enroute area using #3 main engine under light load, crack opened up and lengthened. Engine placed in "limited use" status.

5. During ALEXANDER's attack on June 19th on a SHONAKU type carrier the forward angle solver of the T.D.C. failed to give a correct solution light. A quick check showed that the generator gyro angle was approximately correct and it was decided to fire without a correct solution light.

However, as the target came onto the firing bearing the angle solver was too sluggish to keep up with the rapidly changing bearing. Also the target passed about two hundred yards closer to the ALEXANDER than was indicated on the T.D.C. with the result that the T.D.C. bearing had to be changed several degrees on the last periscope observation before firing. These two factors caused the angle solver to lag enough to make the first five torpedoes just astern of the target.

As the target crossed the bow of the ALEXANDER the bearing began to change less rapidly. Also the generated bearings of the T.D.C. was checking closely with the periscope bearings with the result that the angle solver was able to generate more nearly a correct solution. The sixth torpedo is believed to have been a hit. Examination with the cover removed revealed that the forward angle solver was generating continuously but seemingly under heavy load. The G-BI (20F-A) Servo motor was turning slowly but with variable speed (Time Motor Energized) and seemed unable to catch up with the position keeper solution. Readings with a voltmeter showed full voltage was being delivered to the motor. It was removed and examined. The brushes were badly chipped and pitted. Over one half of the armature coils were shorted out due to carbon dust between the segments of the commutator.

CONFIDENTIAL

(K) Major Defects and Damage.

The Sine follow up head was next removed. A badly bent shaft was discovered at the gearing. Extremity of the roller contact shaft. It was undoubtedly caused at the time of installation due to forcing. This head is awkward and difficult to install due to cramped space. The shaft was straightened, TDC adjusted, and secured.

Conclusions

The bent shaft caused a heavy load on the servo motor as it is geared to this motor. This caused sparking and carbonisation of the commutator until the motor became so weak, due to shorting of coils that it would no longer carry the load synchronously, but would lag the correct solution. The amount of error at anytime could be from zero to an indeterminate amount of lag.

There is no test run on the TDC that would reveal this trouble until total failure, as all angle solver tests are run with the time motor de-energized. The angle solver would come to a correct solution in spite of lag.

Two days previous to breakdown the angle solver had put out a continuous correct solution with a slower problem generating in the position of Kestner.

The obvious conclusion at the time of breakdown was that the micro switches which control the correct solution lights were out of adjustment. This is not an uncommon occurrence. Their adjustment is very fine. This occurrence would have no effect on the actual correct solution.

6. 1150 June 21 auxiliary engine after routine check ran normally for 5 minutes at which time it stopped of its own accord. Investigation showed engine to be approximately 180° out of time. Generator was then pulled out to inspect for sheared bolts in coupling. Coupling itself proved to be broken. No spare aboard. Engine out of commission for duration of patrol. No spares were available at Scadler.

7. 2200 June 21 high pressure air compressor #2 burned out crank bearing of 1st and 3rd stages due to lubrication failure caused by backing out of oil channel plug due to vibration. Shaft replaced from spares. No further difficulty experienced.

8. 0800 June 24 discovered salt water leak in drain pump off cooler. Unable repair leak due to inaccessibility. Coil removed. Pump available for limited operation.

(K) Major Defects and Damage.

9. 2300 June 26 main hydraulic plane automatic by-pass valve gave erratic operation. Believed due to lack of spring tension. Installed washer behind spring to increase tension. No further difficulties experienced.

10. 1608 July 3 main engine #3 after a five minute run was stopped because of excessive noise in blower. Superficial examination showed damage to blower and housing beyond repair capabilities of ship's force. It is believed casualty was caused by misalignment to engine. Engine out of commission for duration of patrol. Repair forces at Seeadler estimated at least 72 hours. IF damage was slight.

CONFIDENTIAL

(L) RADIO

For lifeguard duty during Army air strikes on YAP 8455 kc. CW and 4475 kc. voice were used.

Voice: Initially the reception was poor due to number of stations or circuit with slightly different frequencies; RAL unable to pick up modulation under these conditions because the receiver is so superregenerative that the carrier wave blocked out the voice. In last days of duty as lifeguard, reception much improved as planes frequency adjustment were apparently refined. VHF, which planes have, would be most desirable.

ALBACORE did not know while on station that her voice tests were heard, presumably satisfactorily, as was learned later from Army at Secadler.

Continuous Wave: Once ALBACORE identity was established with Army and a common channel for authentication found, communications were generally satisfactory. Worked mainly with base, whose signal faded daily at 0700-0800 Zebra. Believe Japs tried deception on 26 June at 0820 with strong signal after base faded one hour earlier; asked for V's and wouldn't authenticate. Interference noted from 0755 on 28 June; loud continuous note blocking frequencies around 8455. Planes do not carry CSP 1270 on strike although base does have it.

IFF not used by planes north of equator.

8470 kc. Interference as CW keying resembling poorly made V's and numbers; activity increased when U.S. ship calls up. May be tuned out 40-50% except when adjacent frequencies are active entirely blocking reception from shore station.

Deception by Jap stations using U.S. radio procedure and signals were heard strength 5 (particularly on 17 and 19 June) answering calls from U.S. ships as NPM during this period, the signal strength of real NPM was 0 to 1.

Jap particularly active with interference and deception during MARIANAS campaign.

9090 kc.: Interference on 1100 schedule by modulating station, generally weak, but made copying inaccurate on 30 June.

Radio - Indications of Enemy Radar.

(L) RADIQ

Prior to approach on inter-island steamer (2212 to 2218Z, 2 July) in area where numerous enemy planes were operating, RAL-5 and RAL-7 picked up interference above 5 megacycles with pulse rate of 336 cycles per minute, completely blocking reception. Was external; stopped when antenna removed.

Radio: NPH HAIKU 17370 KC

When power output was increased, received strength 4 with maximum amplification; clear readability, no atmospheric static.

By DDB NARA Date 3/74

(M) RADAR

SD-4 Radar:

Operation of the SD radar during this patrol was excellent. Despite being in use 980 hours, most of which was for 24 hours a day, the radar was out of commission for a period of less than three hours. Contacts on plane formations out to 50 miles were obtained and ranges of 14 to 15 miles could be expected for any plane high enough to be picked up.

Initial difficulties were experienced. False pips were detected at ranges of 2 to 3 miles from 30 May for about a week. It was found that the pips disappeared if the set was kept warmed up when submerged and allowed to warm up before use for a period of 15 or 20 minutes. On 4 July two 9001 R.F. tubes and two 6SK7's were changed in the receiver to reduce the increasing noise level and increase sensitivity. The SD was out of operation for about two hours on this occasion.

Interference encountered was bothersome at times, but originated almost entirely from sources on the boat. Electrical appliances, particularly fans, caused frequent interference of the same general appearance as lightning or of the appearance of vertical lines of noise moving across the face of the scope periodically.

Single readings moving across the scope face, as from another SD radar, appeared on 5 June (Position 25°-35' N., 168°-52' E.) and on 10 June shortly before sighting the SHARK. Small pips travelling across the scope about one-half inch above the dots appeared on two occasions shortly before plane contacts were made and made it necessary to dive. The times were 0610 on 10 June (Position 26°-47' N., 160°-25' E.) and at 2326 on 20 June (position 12°-10' N., 136°-50' E.).

A biggest fault of the SD was its inability to detect low flying planes until their range had closed to nearly five miles. On one occasion a plane was not detected until the range was three miles, long after it had been sighted by the lookouts. The undetected planes came in with elevations as high as eight degrees off the horizon.

SJ-a Radar:

The SJ's operation during the patrol was very good, although it was in use for 1210 hours only about 18 hours were lost through breakdown. A list of operational difficulties and corrections follow this report. Range was obtained on land over 30,000 yards, on a ship out to 25,000 yards and on a plane out to 32,000 yards. Land of any considerable height

By DDB NARA Date 3/74

(1) Radar

A ship (2000 - 3000 feet) could be expected to come in at 50,000 yards and a fair sized ship (DD or larger) would come in at 18,000 yards. The SJ was not reliable for detection of any but slow flying planes.

Interference encountered on the SJ was rare. Railings moving across the scope as from another ten centimeter radar were observed on 10 June, shortly before sighting the SHARK, and on 20 June at 2105 (Position 12°-03' N, 137°-51' E.) shortly before a plane forced the boat to dive. The true bearing of this latter interference was 315. The SJ used a 708AY magnetron. The plane was probably a friendly one.

IFF and DR:

The very little use of the IFF gear was made during the patrol, about 300 hours being the total. Positive IFF responses were obtained only on 10 June when the SHARK was sighted. It was learned that the Army bombers raiding Kure were under orders to remain only south of the island, which would account for the lack of responses although the DR was used on most of the radar contacts while our fire was duty.

Conclusions:

The operation of the radar and IFF equipment may be considered to have been quite satisfactory during the entire patrol. The major suggestion for improvement is that the SD could be much more effective if the beam would cover lower down to the water. The technicians are highly responsible for the fine performance of the equipment and are to be commended for their trouble shooting and preventive maintenance.

Date	Symptoms	Cause	Remedy	Remarks
30 May	No step or precision sweep.	Open coax cable transmitter to range unit	Open coax cable repaired.	
30 May	Poor voltage regulation	Motor generator could not regulate IC power was supplied on board used for most of motor generator set to control.		
1 June	Society or jittery sweep	Is run an hour or so.	Second to be overloaded.

~~CONFIDENTIAL~~ U.S.S. ALBACORE - Report of Ninth War Patrol.

(N) SOUND GEAR AND SOUND CONDITIONS.

The operation of the sound gear was satisfactory except for the JK-QC gear. At about 0809I 19 June, Lat. $12^{\circ}21'N$, Long. $137^{\circ}03'E$, QB listening ranges were obtained at approximately 7000 yds. on SHOKAKU class carrier and ATAGO class cruiser making 27 knots. Listening ranges on escorting destroyers approximately 3,500 yards. No echo ranging attempted. The QC-JK gear was not used because of noisy operation in train caused by shaft binding. Training motor-generator for both QC-JK and QB equipments are excessively noisy. The operation of the JP equipment was particularly good, bearings being obtained on ships beyond periscope sight. Surface noise level was fairly low.

From 0821I to 1010I 3 July, Lat. $08^{\circ}10'N$, Long. $136^{\circ}18'E$, QB listening ranges of approximately 5,000 yards were obtained on a 900 ton diesel powered craft, speed 7 knots. At this time low sensitivity of JK head was noticed, and use of this gear was discontinued. Ground reading on JK head - 200,000 ohms. The JP gear obtained listening ranges of about 8000 yards at this time.

(O) DENSITY LAYERS.

Thirty-six ET Cards were taken and are being forwarded directly to the Vice-Chief of Naval Operations. The following density layers were encountered:

Card : G.C.T. :	No. : & Date :	Position :	Character of density layer
9-1 : 1732 -	: 28°-36'N	: Water of mixed density. averagesely

(P) HEALTH, FOOD, AND HABITABILITY.

Conditions of health were best in several patrols. There were two cases of Cat Fever, one of Cellulitis right leg, and one of Hives. All gave prompt response to treatment. Of the five wounded prisoners taken on 3 July, two were in a serious condition. All responded well to constant and adequate treatment administered by the Pharmacists' Mate. Due precautions were taken against contagious diseases.

Meals, as in the past, were well planned and excellently prepared.

Habitability was generally good but could be improved by increasing supply of air to forward battery.

(Q) PERSONNEL.

- | | |
|--|------|
| (a) Number of men on board during patrol
(This includes one received at Seeadler) | - 74 |
| (b) Number of men qualified at start of patrol | - 43 |
| (c) Number of men qualified at end of patrol | - 53 |
| (d) Number of men making first patrol
(This includes one received at Seeadler) | - 17 |
| (e) Number of men advanced in rating during patrol | - 10 |

The State of training, and the performance of duty in particular under combat conditions of officers and men has been most satisfactory.

Unqualified officers and men are given a set of "Questions for S/M Qualification" at start of patrol. Though the number of men qualified this patrol has perhaps been below standard, the interest shown has been gratifying.

Of the men making their first patrol (d) above all except two, who are classified at the present time as doubtfuls, are considered very good S/M material.

A systematic system of training for next higher rating is carried out by the ship's Educational Officer.

(U) REMARKS

Report on K.18 Torpedoes:

ALACURE carried K. 18 torpedoes aft. None were fired and therefore no report on performance can be made.

Torpedoes, when received aboard, were in excellent shape, except that one torpedo had three plates and ventilation plugs had been set up so tightly that the gaskets had been cut. However the latter may have been necessary to insure watertightness.

During the patrol no unusual difficulties were experienced. One stop valve spindle was broken and after we had installed our one spare we began to wish that the allowance list had called for more than just one. Several burners wires and indicator bulbs were burned out in the hydrogen eliminator circuit, probably because we carried no AC ammeter and therefore had to use resistance readings as an indication of the current flow in the circuit.

Authority: ~~UNRESTRICTED~~

By DBB NARA Date 3/94

~~CONFIDENTIAL~~

(U) REMARKS

Torpedoes were charged once a week, one torpedo in the tubes being charged at the same time as one in the racks. The tubes were required for charging and no difficulties in shifting torpedoes arose using this method. In general these torpedoes were much less troublesome than had been anticipated.

Gun firing - a tonic for morale.

After deciding the ship sighted on 3 July was too small for torpedo fire, stations for battle surface was sounded. The gun's crew assembled in the conning tower, the mental alertness shown in sparkling eyes and clear headed expressions, the evident grim determination mingled with smiles of satisfaction left a picture not soon to be forgotten - a picture that told the commanding officer the fighting spirit was there and there to stay until our job is well done.

SUBMARINE DIVISION ONE HUNDRED FORTY ONE

FB5-141/16-3

Serial: 023

CONFIDENTIAL

FIRST ENDORSEMENT to
U.S.S. ALBACORE report of
Ninth War Patrol.

Care of Fleet Post Office,
San Francisco, California,
18 July 1944.

From: The Commander Submarine Division One Hundred Forty One.
To : The Commander-in-Chief, UNITED STATES FLEET.
Via : (1) The Commander Submarine Squadron FOURTEEN.
 (2) The Commander Submarine Force, PACIFIC FLEET.
 (3) The Commander-in-Chief, U.S. PACIFIC FLEET.
Subject: U.S.S. ALBACORE (SS218), Report of War Patrol number NINE.

1. Forwarded.

2. The Ninth war patrol of the ALBACORE was conducted in area west of the MARIANAS and in the PALAU area. The patrol extended over a period of 47 days, of which 26 days were spent in the area. One week was spent on life-guard duties off YAP and on two occasions ALBACORE was strafed by enemy planes. No aviation personnel were rescued. Eighty-eight aircraft contacts (including friendly planes) were made during the patrol.

3. On June 11, ALBACORE sighted a convoy, but before attack position could be gained she was driven down by enemy aircraft. Upon surfacing, a retiring search was made covering all probable courses and speeds, but contact was never regained.

4. Attack number one, during the morning of 19 June, was conducted at periscope depth on an aircraft carrier which was part of a JAPANESE task force consisting of the following ships: two carriers, two cruisers, and at least six destroyers. Attack lasted for fourteen minutes, in which time three complete set-ups were obtained. Excellent attack position at 1600 yards and 20° track was obtained. Just prior to last check on firing bearing, the T.D.C. failed to show correct solution light. While trying to locate the trouble, target got by the Mk. 8 firing bearing. Target speed was estimated at 27 knots, which did not allow enough time to swing ship or set gyro angle on the torpedoes. This was a very tragic situation to be in and split second decision was necessary. Thinking possibly the correct solution light was burned out, and rather than miss a shot entirely, the Commanding Officer accepted the false solution and commenced firing. Continuous bearings from the periscope were set in the T.D.C. Past analysis showed the generated gyro angle was lagging the correct gyro angle by 15°. However, as the target crossed the bow the bearing began to change less rapidly and after the last periscope bearing was introduced into the T.D.C., the angle solver was able to generate more nearly a correct solution. The first five torpedoes missed astern of the target, but it is believed that the sixth torpedo hit. Damage determined by one timed torpedo hit; three heavy explosions one hour later; two fires; minus one carrier.

and three destroyers when attacked by JAVILLA three hours later; oil slick covering ten mile area in vicinity of attack 22 hours later. After this attack ALBACORE was severely depth charged.

On 30 June, the ALBACORE made two excellent gun attacks at short range on the phosphate works on FAIS ISLAND. The fire was accurate and deliberate. Many hits were obtained, blowing the roofs off buildings and starting numerous fires.

On 3 July, the ALBACORE destroyed the 989-ton TAIHEI MARU by gunfire. Identity of the ship was established by the five survivors taken aboard as prisoners of war.

5. The ALBACORE arrived in very good material condition with the exception of two major defects. Number three main engine has a cracked housing (previously repaired) and the blower on this engine has seized. Investigation is being made to determine the cause of these casualties and whether or not they are irreparable. These defects will be corrected during the current refit by BUSHNELL.

6. The Commanding Officer, officers and crew are congratulated on an aggressive patrol. It is recommended that ALBACORE be credited for inflicting the following damage on the enemy:

COMSUBSPAC PATROL REPORT NO. 483
U.S.S. ALBACORE - NINTH WAR PATROL.

From: The Commander Submarine Force, Pacific Fleet.
To : The Commander-in-Chief, United States Fleet.
Via : The Commander-in-Chief, U. S. Pacific Fleet.
Subject: U.S.S. ALBACORE (SS218) - Report of Ninth War Patrol.
(29 May to 16 July 1944).

1. The ninth war patrol of the ALBACORE was spent in areas west of the Marianas and also in the Palau Area.

2. The first part of the patrol, spent on offensive missions west of the Marianas, resulted in but one contact, a convoy, which could not be closed due to enemy anti-submarine activity. The next part of the patrol was spent north of Palau at a possible interception point of a large Japanese task force believed headed for Saipan. This task force was contacted in the early morning of 19 June. The ALBACORE obtained excellent attack position on a large SHOKAKU class carrier, but an unfortunate torpedo data computer casualty caused misses of all but one of the six torpedoes fired. This attack was well planned and aggressively conducted. The next part of the patrol was spent performing lifeguard duties in the vicinity of Yap and Ulithi Islands. During this lifeguard duty, the ALBACORE was bombed and strafed several times by enemy planes.

3. The ALBACORE conducted a well planned bombardment of the phosphate works on Fais Island. Later, a small inter-island steamer was shelled and sunk. Five prisoners and captured documents were taken from this vessel.

4. This patrol is designated as "Successful" for Combat Insignia Award.

5. The Commander Submarine Force, Pacific Fleet, congratulates the Commanding Officer, officers, and men for this aggressive and successful war patrol. The ALBACORE is credited with inflicting the following damage upon the enemy:
