

coral. Since I know very little about the formation of coral. (this is where you should shine) It is very interesting. It looks like a rock material yet it is supposed to be animal life. The formation that is covered by the water is really beautiful with its many different colors.

Say what grades do you teach. Those letters were well written and what they said, sounded as if they were pupils from the seventh or eighth grade. I hope this one letter to all of them will be sufficient. I know if I were in their shoes I would like to receive one addressed to me personally, but - you know me. Letter writing is such a chore. Receiving them is an all together different story.

I saw the picture "The Song of Bernadette" about two weeks ago. All entertainment is free. Most of the movies (which we can see every night) are ones I have seen while back in the states. I guess we are on even term, Sister, and seamen when it comes to the admission part of a show.

Well Bernette. I wish to thank you for all your doing for me. I certainly enjoyed the letter from the children and I appreciate the thought for me. Love Tony.
