

*There was no mission report for June 25, 1944  
Submitted by XAC 372nd Sqdn.  
This one goes in the 307th Bomb Group report.*

APO #324

25 June 1944.

CONSOLIDATED MISSION REPORT NO. 307-292

DATE OF MISSION : 25 June 1944.

MISSION : The 5th Bomb Group (B) leading with two (2) six (6) planes Sqdns plus two (2) six (6) plane Sqdns of this Group will attack the runway and revetment area at Yap Airdrome, Yap Island at 1200/K 25 June 1944. The target for this Group will be the revetment area.

PLAN OF ATTACK : Prior to reaching the IP a loss of 500' will be accomplished. The Sqns will bomb in trail, flights javelin down within the Sqdns. The 370th Sqdn will proceed over the target first with the 372nd Sqdn in trail 500' below. Lead bombardiers of each Sqdn will sight for range and deflection; all other bombardiers for range only. The bombing airspeed will be 165 MPH and the bomb intervals will be as follows:

10 stations - 260'  
15 stations - 170'  
20 stations - 120'  
30 stations - 80'

Alternate Target: Yap Town

Tertiary: Enemy installations on Sorol Island.

ESCORT : None scheduled.

BOMB LOAD : 9 A/C each carried 30 clusters of 6 x 20# fragmentation bombs. 3 A/C each carried 20 clusters of 6 x 20# fragmentation clusters. Total of 330 clusters of 6 x 20# frag clusters.

TARGETS ATTACKED : Revetment area, Yap Airdrome, Installations on Sorol Island.

AIRPLANES EMPLOYED : 12 Liberators, 6 from the 370th leading 6 from the 372nd, 10 A/C bombed primary, 1 bombed Sorol.

TAKE OFF : From Mokerang between 0522 and 0607/K.

ROUTE : Mokerang to Sorol Island to IP (a point 09030°N - 135°11' to the target. Route back was direct to Mokerang.

WEATHER : .4 to .5 cumulus with tops at 7,000 to 8,000' and a thin .3 to .4 alto-stratus layer at 12,000'. This weather prevailed enroute and over target. A squall line was encountered on return from 01°00'S to 01°30'S. Winds 8 knots from 120°.

PREPARATION EMPLOYED : Javelin Down within Squadrons.

TYPE ALTITUDE &amp;

HEADING OF ATTACK: At YAP between 1146 - 1148/K from 11,500 to 12,200' T with max heading of 255° to 260°.

CONFIDENTIAL

At Sorol 3 runs were made between 1946 - 1048/K from 8,700'. Two were made on a mag heading of 45°, one with mag heading of 225°.

**BOMBS DROPPED** : 270 clusters of 6 x 20# frag bombs over Yap.  
30 clusters of 6 x 20# frag bombs over Sorol.  
30 clusters of 6 x 20# frag bombs jettisoned.  
Total 330 clusters of 6 x 20# frag bombs.

**BOMB RELEASE PROCEDURE** : Lead bombardiers sighted for range and deflection, all other bombardiers sighted for range only.

SQUADRON	GROUND SPEED	INTERVAL	AIRING POINT
375th	199 MPH	1 x 60°	R&D: Sorol radio station
	205-216 MPH	1 x 120°	R&D: 3000' NW of NE end of R/W.
		4 x 170°	

378th	180-208 MPH	1 x 120°	R&D: 1st bunker S. of runway - roads in center of revetment area.
		1 x 160°	
		1 x 170°	
		1 x 260°	

**BOMB HITS OBSERVED** : One squadron's pattern hit in the center of the revetment area, extending from the 2nd taxi loop from the E to the western taxi loop.

One squadron's pattern along the northwestern side of the revetment area.

**RESULTS** : One U/I aircraft parked in a revetment was seen demolished by a near miss. The A/C exploded and scattered fire around the revetment.

**AA FIRE** : Heavy-slight to moderate and inaccurate fire was received from Yap. Nil from Sorol. The following AA positions were noted at Yap:  
1. Just N of NE corner of R/W.  
2. 700' NW of the NW end of R/W.  
3. 2,700' due N of the NW end of R/W.  
4. Three guns were observed firing at the S end of the runway in southern part of Gagil Tomil Island.

**ENEMY INTERFERENCE** : 18 to 20 enemy fighters intercepted from 2 minutes before bombs away for 30 minutes. They consisted of Zeke with 1 Tony and 1 Tojo. The Tojo was described as having elliptical trailing edges on the wings and closely resembled a P-47. About 20-25 passes were made at the formation, being pressed very eagerly - most of them from 12 and 6 o'clock low. Every trick in the book was tried with two, three and four Z/A coordinated attacks developing from positions all around the clock.

Several of the Zeke's had silver colored wing tips and rudders and green fuselages.

The Tony was reported to have a large white spinner, light blue camouflage and meat balls on wings and fuselage. The Tojo reported might possibly have been one of the new type Raiders, lacking more specific information on this new E/A it is impossible to make a definite identification. Three Zeke's are credited as sure kills to our gunners and two damaged.

**SITES:**

CONFIDENTIAL

A/C #567, 372nd A-2; S/Sgt Jepson, ball turret gunner and T/Sgt McMillen, left waist gunner fired on a Zeke coming in from 9 o'clock low. The E/A caught fire at the wing roots with flames going past the tail and crashed in the water. Verified by S/Sgt Jenkinson tail gunner on A/C #567 and Sgt Odewils tail gunner on A/C #863, A-3.

A/C #599, 372nd A-1: S/Sgt Miller, ball gunner, nailed a Zeke closing to 200 yards from 11 o'clock low. The Zeke broke away to the left and then exploded in the air. No parachute was seen to open. Verified by Lt. Martin pilot of A/C #119, A-2.

A/C 147 and A/C 1090, 370th A-1 and B-3: S/Sgt Robert Tay ball gunner on plane #147 and S/Sgt Matrowski right waist gunner on A/C 1090 teamed up on a Zeke closing to 600 yds from 4 o'clock low. It rolled over, smoke pouring from the cowling and plunged into the sea. Verified by Lt. Arnold navigator on A/C #147.

DAMAGED:

A/C #557, 372nd A-2: S/Sgt. Kaier, nose gunner, and T/Sgt McMillen, left waist gunner combined their fire to knock the engine cowling and entire cockpit canopy off a Zeke closing from 9 o'clock level.

A/C #591, 372nd A-1: S/Sgt. Miller, nose gunner, hit a Zeke closing from 12 o'clock slightly low, to 100 yards. The E/A was last seen entering a cloud with flames coming from each side of the fuselage.

DAMAGE OR LOSS : One B-24 and crew lost; 1 heavily damaged by E/A interception; 1 slightly damaged by E/A action and one damaged by a combination of AA fire and E/A action.

A/C #598, Pilot, Lt. Coleman was attacked by a Zeke about one minute and half after bombs away with hits being scored on #2 and #3 engines. The cockpit and bombardier's compartment were seen with flames coming out of the windows which had been shot out. The plane made a perfect loop, then fell off to the right in a spin and crashed in the water 2 miles S of the runway. It was strafed all the way down and also after hitting the water. No parachutes were seen and it is believed that all members of the crew are dead.

A/C #119, Pilot, Lt. Martin, received a 20 mm. shot in the wing outboard of his #4 engine and one 20 mm. shot which went through the right tire and penetrated the rim.

1. Three crews reported the possibility of the Gasil - Feri. R/ being serviceable.
2. A narrow green strip, varying in color from that of the surrounding terrain was observed 6000' S of Yap A/D just off the P/T road. It appeared to be a possible emergency landing strip.

RADIO DISCIPLINE : "In flight" reports were sent. VHF channel "D" carried unusually heavy traffic. Numerous crews recommended more stringent radio discipline in the use of this frequency.

PHOTOGRAPHS : None taken and preliminary interpretation shows:

— 1 —

NOTE: Quality of photos is excellent. Coverage of 372mi B.S. pattern is incomplete. Bombs are plotted as to pattern only due to type of bombs dropped.

BOB R. T FNC

: Excellent in accordance with Thirteenth Air Force Directive  
27 August, 1943.

## REMARKS

A/C 542, pilot Lt. Dryer, jettisoned 30 clusters of 6 x 20 fragmentation bombs at 00°19'S - 146°015'E. RT on the engine was oscillating between 2000 and 2400 erratically. The engine was vibrating so badly it was finally feathered and a heading taken up for base.

A/C #075, Pilot Lt. Kimmerle, developed a gas leak at 0815... Despite the fact gas was running into the bomb bay from the wing section - cause unknown - this A/C continued on course to bomb Sorol Island, making three runs and dropping 10 clusters of 6 x 10 fragmentation bombs on each run, causing three solid fires.
