## AIRCRAFT ACTION REPORT

XII. TACTICAL AND OPERATIONAL DATA. (Narrative and comment. Describe action fully and comment freely, following applicable items in check list at left. Use additional sheets if necessary.)

Times stated in this narrative are expressed in zone - 10 time and dates in east longitude in accordance with operation plan.

This flight was launched at 0640 on 27 July 1944 and proceeded to Yap 89 miles distant on bearing 341°. After circling the island the bombers attacked their targets from 13,000 feet on course of 140°. After the bombing attack six planes returned for strafing attacks on the power plant and airfield. During this attack Lt. (jg) BELING's plane was shot down by enemy anti-aircraft fire. The pilot parachuted to the water and was rescued by a Kingfisher rescue plane. He suffered second degree burns on his arms and legs, but his condition is satisfactory. The radioman, Curtis L. WRIGHT, AFM2e, is believed to have jumped from the plane before the pilot, but his parachute was not seen to open. After the strafing attack, the flight returned to base and landed aboard at 0950.
